

Donaldson Industrial Air Filtration and Heneveld Group, LLC Product Disclaimer

Donaldson Industrial Air Filtration collectors are manufactured by Donaldson a variety of applications. Some of these applications (such as grain handling/processing and woodworking) include inherent fire and explosion hazards. The Heneveld Group, LLC (Heneveld) is authorized to market and sell Donaldson air filtration products. In that capacity, Heneveld, together with Donaldson, hereby make the following disclaimer to our customers and equipment users.

Donaldson and Heneveld are neither experts nor certified consultants for fire, spark, or explosion detection, suppression and control. Furthermore, our customers and equipment users acknowledge that there are many factors which contribute to fires, and explosions that are out of the control of Donaldson and Heneveld. These factors include, but are not limited to, the design and maintenance of ductwork, fire suppression and detection systems as well as worker procedure and error. Therefore, Donaldson and Heneveld assumes no liability for the fitness of any of the Donaldson products with respect to fires and explosions for a particular installation or application.

Donaldson Industrial Air Filtration products are available with sprinkler taps and/or explosion vents, but the fitness of these devices for a particular application or installation is the responsibility of the customer. Donaldson and Heneveld recommend that all dust control system designs be reviewed and approved by an expert consultant who is responsible for the integrity of the system design and compliance with locally accepted codes. Donaldson and Heneveld also recommend that proper maintenance procedures and work practices be followed to maintain any dust control system in safe operating condition.

Donaldson and Heneveld recommend that customers, equipment users and consultants work with them during the proposal and design stages of projects so that Donaldson and Heneveld may recommend an appropriate dust collector for a given dust control system. Donaldson and Heneveld may provide referrals to suppliers of equipment designed to detect and/or suppress sparks, fires and/or explosions, but Donaldson and Heneveld does not assume any responsibility for such referrals.

This Disclaimer is to be included with all quotes and proposals made by Donaldson Industrial Air Filtration and Heneveld Group, LLC for Donaldson products which are to be used in grain handling/processing applications or other applications with inherent fire and explosion hazards. Acceptance and/or approval of quotes and/or proposals include the acceptance of this Disclaimer.
